DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-53, 88, and 89, drawn to an apparatus, classified in class 536, subclass 22.1.
 - II. Claims 54-80, drawn to method of preparation of the apparatus, classified in class 435, subclass 91.1.
 - III. Claims 81-87, drawn to method of use of the apparatus, classified in class 435, subclass 6.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the apparatus of Group I can be made by the process of Group II or can be made by solid-phase chemical synthesis or by enzymatic ligation or by photosynthetic modification of oligonucleotides.
3. Inventions of Groups I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the

Art Unit: 1634

product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process of Group III can be practiced with the apparatus of Group I or can be practiced by solution phase hybridization or immunoprecipitation in the liquid phase.

4. Inventions of Groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, method of preparation of the apparatus of Group II is not disclosed as capable of use together with the method of use of the apparatus of Group III and they have different modes of operation, different functions, or different effects.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to J. Derek Mason on January 24, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun Chakrabarti, Ph.D. whose telephone number is (703) 306-5818.
